Professional Summary

Motivated and detail-oriented Computer Science student with a strong interest in Full Stack Web Development and Software Engineering. Skilled in HTML5, CSS3, JavaScript, React.js, MySQL. Strong foundation in Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, and Software Development principles. Passionate about building responsive web applications and continuously learning modern technologies. Seeking a Web Developer or Full Stack Developer role to contribute technical and problem-solving skills.

Technical Skills

Programming Languages: Java, JavaScript, SQL

Web Development: HTML5, CSS3, JavaScript, React.js, Node.js

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Data Structures and Algorithms, DBMS, Operating Systems, Software Engineering

Education

Bachelor of Technology (Artificial Intelligence & Machine Learning)

Narayana Engineering College, Gudur

2024(Pursuing)

CGPA: 8.6

Diploma in Computer Engineering

Audisankara College of Engineering & Technology, Gudur

2021 – 2024

Percentage: 92

SSC (BSEAP)

Z.P.P. High School, Chillamanuchenu

2020 – 2021

GPA: 9.7

Projects

Title: AI-Based Network Intrusion Detection System

Role: Developer

Duration: 2 Months

Description: Developed an AI-based intrusion detection system to identify malicious activities in network traffic. Applied machine learning algorithms to classify normal and suspicious behavior using network datasets. Performed data preprocessing and model evaluation to improve detection accuracy. Enhanced network security through real-time threat identification and monitoring.

Title: Fake Reviews Detection Using Machine Learning Algorithms

Role: Developer

Duration: 2 Months

Description: Built a machine learning model to identify fake reviews from online platforms using text classification techniques. Performed data cleaning, feature extraction, and model training to improve prediction accuracy. Evaluated model performance using standard machine learning metrics. Helped enhance trust and reliability in online review systems.

Title: Student Management System

Role: Full Stack Developer

Duration: 1 Month

Description: Designed and developed a full-stack Student Management System using React.js, Node.js, Express.js, and MongoDB. Implemented CRUD operations for managing student records, attendance, and academic details. Developed RESTful APIs for seamless communication between frontend and backend services. Built a responsive and user-friendly interface while ensuring efficient database management and data retrieval.

Certifications

- Artificial Intelligence – Plasmid Innovations
- Quantum Fundamentals Certification – WISER Program
- Web Development Fundamentals
